

Deekshith Hari V M

Nationality: Indian **Date of birth:** 02/03/1992 **Gender:** Male

Phone number: (+91) 8129012852 **Email address:** deekhari00716@gmail.com

LinkedIn: <https://www.linkedin.com/in/deekshith-hari-v-m-352bb518a/>

Github: <https://github.com/deekshithm0203>

Home: SreeHari, Templegate (PO) Madapeedika, Thalassery, 670102 Kannur (India)

WORK EXPERIENCE

GlobalLogic – Bangalore, India

Associate Consultant

[07/02/2024 – Current]

- Built GenAI pipelines from scratch to summarize documents, tag them with relevant metadata, and enrich content so that downstream search and retrieval actually worked well for end users.
- Set up RAG workflows using Milvus and Pinecone as vector stores, experimented with different chunking strategies, and added embedding caching to speed up repeated queries.
- Worked extensively with GPT, Gemini, Claude, Mistral, Falcon, and LLaMA for various tasks like document understanding and content generation. Used OpenAI Ada as embedding models, and Cohere Rerank to re-rank top-k chunks for better retrieval quality.
- Implemented agentic chunking where the LLM dynamically decides how to split and group document content based on context and meaning, rather than relying on fixed-size or rule-based chunking approaches.
- Introduced embedding caching and LLM response caching with Redis, which cut down redundant API calls significantly and helped reduce both latency and inference costs in production.
- Spent a good amount of time on prompt engineering writing and refining system prompts, trying few-shot examples, chain of thought approaches, and tweaking prompts iteratively to get more reliable and consistent outputs from the models.
- Used Apache Airflow (2.x and 3.x) to schedule and orchestrate data pipelines, and built FastAPI endpoints to trigger and manage Airflow DAG runs programmatically, giving the team more control over pipeline execution.
- Set up centralized logging and monitoring using OpenTelemetry and Elastic Search to track what was happening across all the AI services in real time.
- Ran a POC using Azure Form Recognizer and OCR to extract structured data from scanned documents and images, evaluating its feasibility for production use.
- Wrote and maintained test suites with pytest covering API endpoints, AI pipeline logic, and integration flows to catch issues early.

Delvic Technologies – Bangalore, India

Senior Software Engineer (12 Months Contract)

[13/02/2023 – 08/02/2024]

- Designed and implemented the overall architecture of backend systems, including database models, API endpoints, serializers, views, and authentication mechanisms.
- Developed secure and scalable RESTful APIs using Django and DRF, handling request/response data and implementing authentication and authorization.
- Managed databases with raw queries and Django's ORM, designing schemas, writing efficient queries, optimizing performance, and ensuring data integrity.
- Optimized database queries by indexing, minimizing joins, and employing advanced query optimization techniques for improved API response times.
- Implemented user authentication and authorization systems using Django's built-in features and third-party libraries like DRF authentication classes and permissions.
- Integrated third-party services, such as payment gateways and social media APIs, to enhance backend functionality and ensure seamless platform integration.
- Implemented caching mechanisms, including query and response caching with Redis, to improve response times by reducing database load.

 **Trade Brains** – Bangalore, India

Python Developer

[10/11/2021 – 10/02/2023]

- Designed and developed API endpoints using Python, Django, Flask, and REST API with object-oriented programming and database design.
- Conceptualized and built forms for a portal app, enabling user signup, profile creation, and contact updates.
- Delivered scalable APIs with time complexity analysis, reducing load time by 80% (from 5 seconds to 900 ms).
- Optimized ORMs to minimize query runs, reducing database load.
- Developed and maintained automated test suites using pytest, ensuring robust test coverage and high code quality.
- Wrote Docker files, integrated CI/CD through GitHub Actions, and set up cloud services on AWS.
- Implemented microservices architecture and continuously improved processes through Agile methodology.

 **Tech IS** – Bangalore, India

Django Developer

[04/04/2021 – 10/11/2021]

- Involved in the design, development, and support phases of the software development life cycle, with a focus on Test-driven Development (TDD) and continuous improvement through Agile methodology.
- Developed an API-driven information service website for coding institutes in Japan and the US, attracting 10,000 monthly views, and created a mission-critical external web app (Restaurant menu app) that increased user retention by 70%.
- Prepared test cases and scenarios based on business requirements, set up a CI/CD environment, and deployed applications on Heroku.
- Developed front-end applications using React and Redux, and documented modules and projects thoroughly.

 **NTT Data** – Bangalore, India

Data Centre Engineer

[10/05/2019 – 01/04/2021]

- Designed and developed Unix shell scripts to automate the ETL loading process, enhancing efficiency.
- Executed ETL tasks, including data pulls and pushes across various servers.
- Automated hourly ETL script runs using Python and batch scripts.
- Parsed XML documents and loaded data into the database using Python scripts, and rewrote existing Python modules to deliver specific data formats.

 **CMSIT Services** – Delhi, India

Application engineer

[10/08/2017 – 07/05/2019]

EDUCATION AND TRAINING

Bachelor of Engineering in Computer Science Engineering

visvesvaraya technological university

Address: Jnana Sangama, VTU Main Rd, Visvesvaraya Technological University, Machhe, Belagavi, Karnataka 590018, 560060 Bangalore (India) | Website: <https://vtu.ac.in/>

DevOps Certification

NTT DATA Learning And Certificate Institute

Address: 123, Rd Number 2, EPIP Zone, Whitefield, 560066 Bangalore (India)

DevOps Training

Intellipaat

Address: AMR Tech Park 3, Ground Floor Tower B Hongasandra Village, Hosur Rd, Bommanahalli, 560068 Bangalore (India) | Website: <https://intellipaat.com/>

LANGUAGE SKILLS

Mother tongue(s): Malayalam

Other language(s):

English

LISTENING C2 **READING** C2 **WRITING** C1

SPOKEN PRODUCTION C1 **SPOKEN INTERACTION** C1

Kannada

LISTENING B2 **READING** A1 **WRITING** A1

SPOKEN PRODUCTION B2 **SPOKEN INTERACTION** B2

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

SKILLS

Programming Languages and Libraries

python3 / GenAI / Agentic AI / Langchain / LangGraph / Apache Airflow / Django / FastAPI / Flask / pytorch / React JS / Data Analysis: Numpy, Pandas. / Celery / Kibana / RabbitMQ / SQLAlchemy / Jinja2 / PyTest / Docker / Kubernetes / Git / Microservices

Database

PostgreSQL / MySQL / NoSQL (MongoDB) / Redis

Cloud Services

MS Azure / AWS / AWS S3 / AWS EC2 / AWS lambda / AWS ECS / Digital Ocean Cloud / GCP

PROJECTS

[13/02/2023 – Current]

Woonwijzerwinkel

- Developed a house scan app to identify insulation, ventilation, solar panels, heat pumps, solar boilers, and sustainable materials.
- Utilized Vue.js for frontend and Django for backend, with a MySQL database.
- Developing a new React-based frontend.

Link: <https://woningscan.woonwijzerwinkel.nl/>

[04/12/2021 – 11/02/2023]

Fingrad

- An E-Learning app for trading and stockmarket related courses and webinars.
- Utilized React-Redux for frontend and Django Rest Framework for backend.
- Implemented MySQL database for data management.
- microservices architecture using RabbitMQ for message queuing and Kubernetes for container orchestration and management.

Link: <https://joinfingrad.com/>

[06/05/2022 – 11/02/2023]

TradeBrains Portal

- A stock market analysis tool.
- Utilized React-Redux for frontend and Django Rest Framework for backend.
- Implemented MySQL database for data management.
- microservices architecture using RabbitMQ for message queuing and Kubernetes for container orchestration and management.

Link: <https://portal.tradebrains.in/>
